

QUALTECH[®]

PALLET WASHER

Quality, Safety & Economic

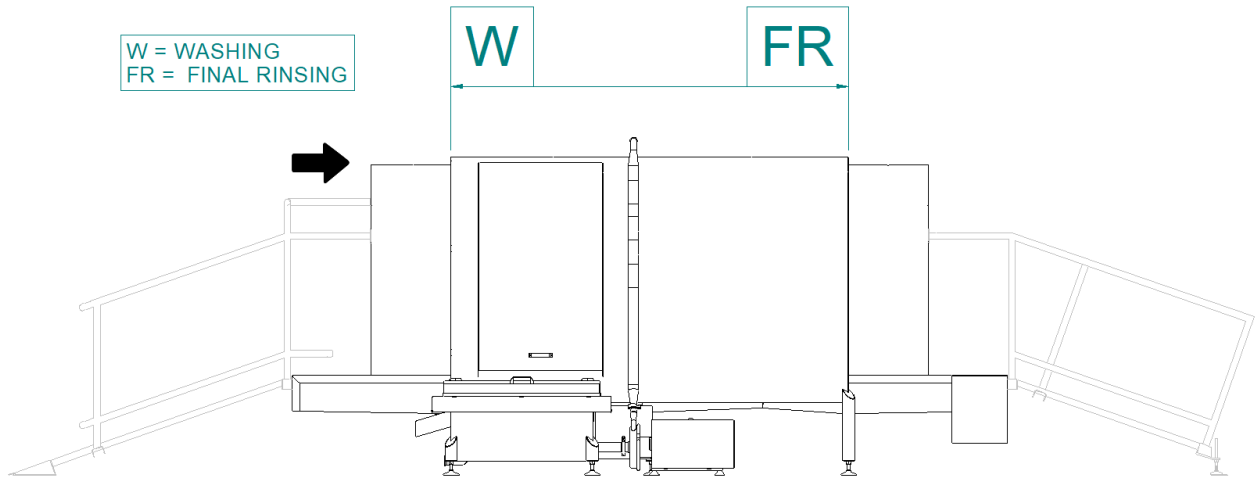

Our continuous chain washing system is designed and adapted for cleaning pallets and panels. The automated system, controlled via a touch screen, ensures optimization of energy efficiency, water consumption, and detergent use, while guaranteeing safe operation.

- Spray nozzles covering the entire wash area
- Recycling of water and detergents through conductivity analysis in a closed loop
- Management of water levels and heating
- Automatic filtration system and waste disposal
- Optional self-cleaning (CIP)
- Option to adapt manual or automatic loading
